UNAL's RISCV

by **Carlos Camargo Bareño**

0000 HDL Project

github.com/cicamargoba/femto_UN

"*Bruno Levi's femtoRV imnplementation*"

How it works

This is a femtoRV implememtation using SPI flasg and spiRAM ## How to test

You must program an external flash memory wioth desired application, all communication and debug messages are displayed in UART

External hardware

one LED one USB-SERIAL dongle

Project Pinout

Digital Pins
